COPENHAGEN B., 33, VESTERGADE November 12th 1913

E. G. Gollo Esq.,

Cisano sul Neva, Genova.

Dear Sir,

We have received your favour of the 8th inst, and noted that you agree with the alterations we have made in the drawings for the buildings.

In our drawing No. 100991 we have shown the cement silo in ferro concrete covered with a roof composed of two inclined surfaces like those of an ordinary roof leaving a gap at the top in the entire length of the building thus enabling cement to be filled into the silo at different places.

Further we have shown each of the long free edges of this roof being carried by a cross beam of steel i.e. that the roof is supported in the middle by the steel bridge spanning the whole length

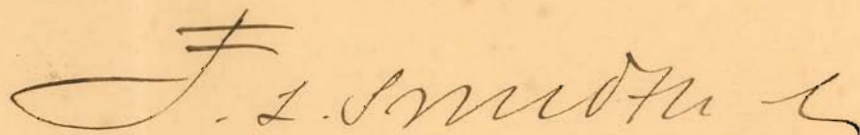

of the silo. We have chosen this construction, because we are of opinion that it would be the cheapest to build, but, of course, there will be no difficulty in making the above named bridge in ferro concrete too if you should find this convenient.

We have at once asked our friends to work out a tender for the steel construction of roofs and bridges, and we hope to be able to send you these tenders before the 22nd inst.

To-day we are sending Messrs. Hamel & Horley two copies of specification and conditions for the tender, and we have the pleasure to enclose one copy for yourself, hoping that the same will reach you in due time.

We beg to remain,

Yours very truly,

A handwritten signature in cursive script, reading "F. L. Smidth". The signature is written in dark ink and is positioned in the lower right quadrant of the page.
