COPENHAGEN B., 33, VESTERGADE February 23rd 1914

Messrs. The Siam Cement Company, Ltd.,

B a n g k o k .

Dear Sirs,

To-day we have the pleasure to send you our drawing Progr.
No. 102457 showing the silo for cement in the shape which was agreed
upon with Mr. Gollo.

In the same drawing are shown all the pipes through which
the cement is sucked out of the silo by means of Exilors. We have
now put in hand all these pipes, and would for this reason be glad
if you would be able to avoid alterations in the arrangement laid
down in the above named drawing. If, however, it should be necessary
to have some alteration made, we ask you to send us a wire so that
we can stop the work on these pipes until we get your further news.

As to the making of the belt conveyor from the cement mill
to the cement silo, we have put this apparatus in hand according to

F. SMIDTH & Co., COPENHAGEN. 23/2/1914, The Siam Cement Co., Ltd, Bangkok.

SHEET No. 2.

our drawing Progr. No. 102370. The machinery for the kiln house is made in accordance with our drawings Progr. No. 102800 and 102805. We beg you to kindly send us your confirmation as to these points.

Meanwhile we remain,

Yours truly

F. L. Smidth
